DIGITAL ILLUSTRATED

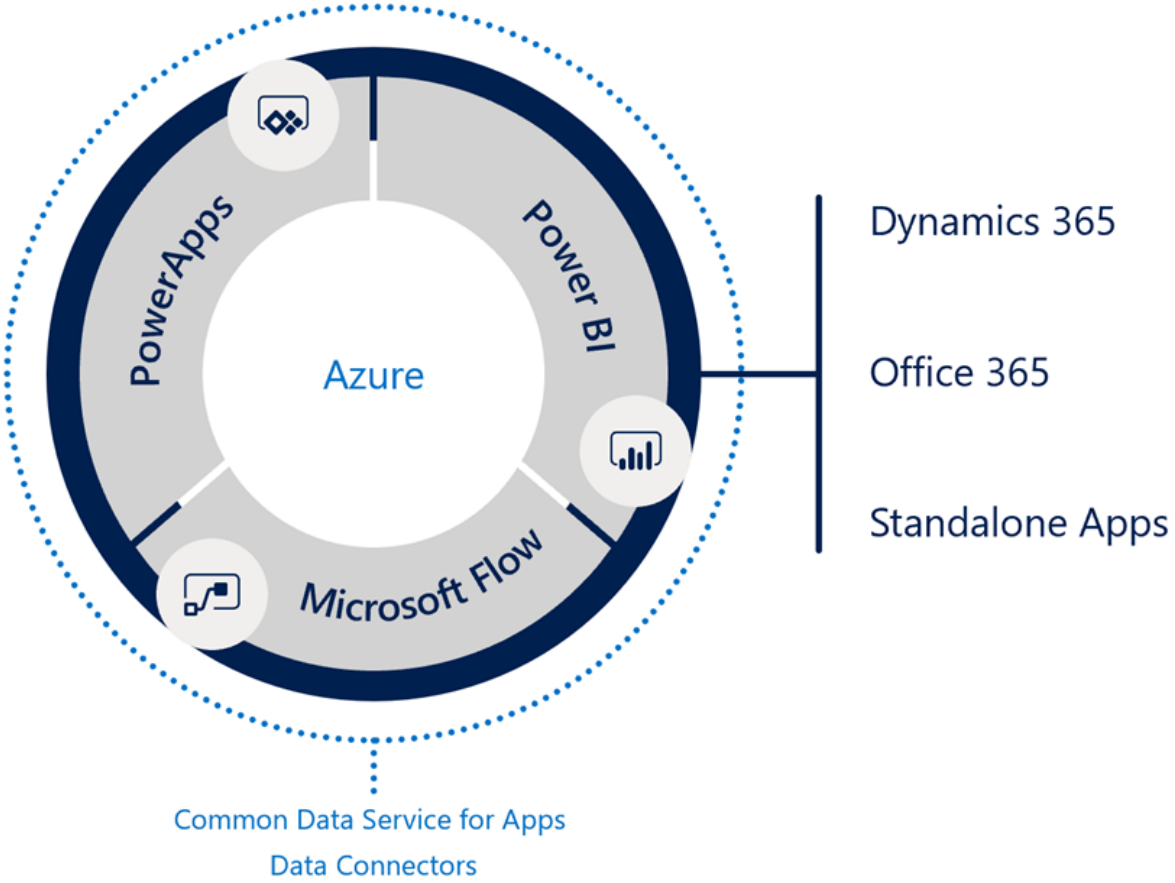
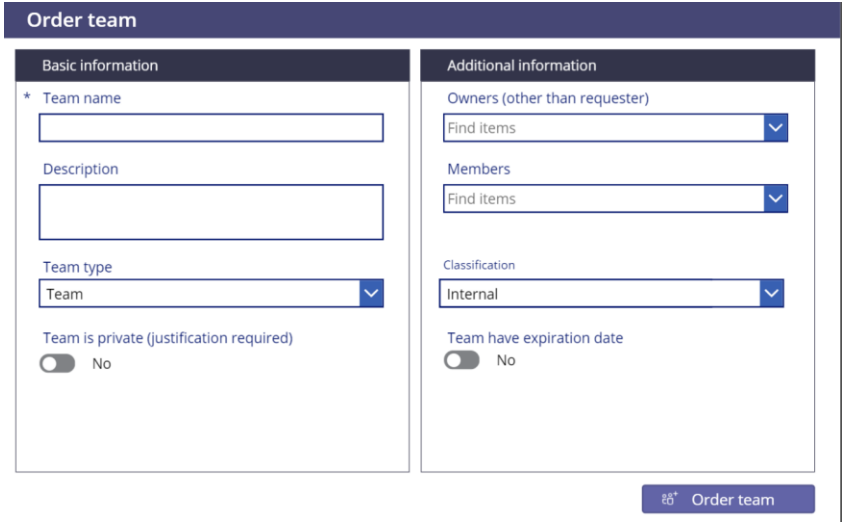
Microsoft Power platform

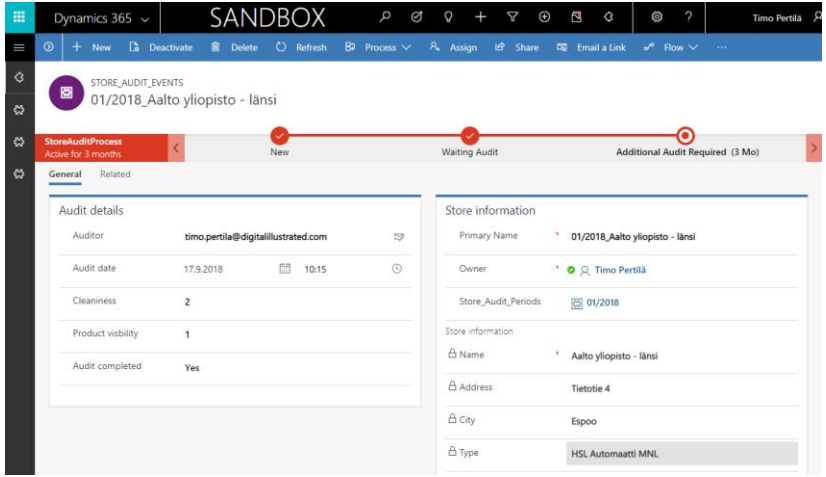


Canvas vs. Model-driven PowerApps

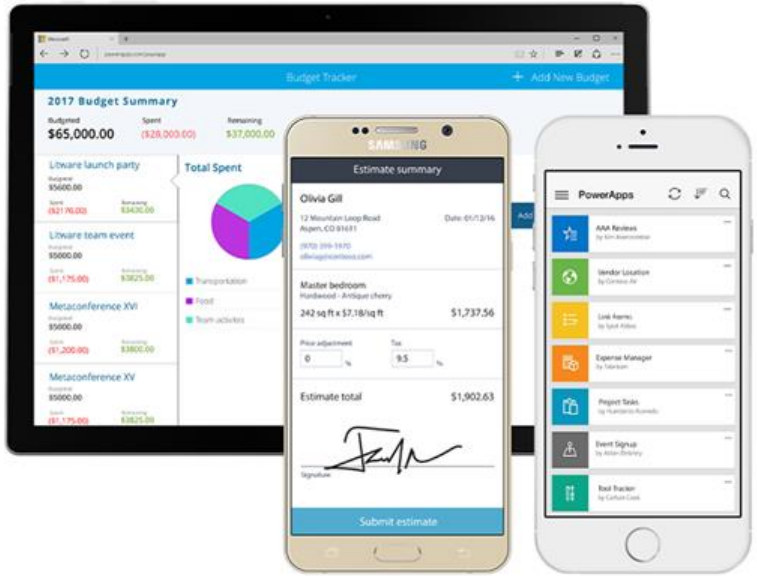
Canvas



Model-driven



PowerApps in a Nutshell



- Solutions with little or no code
- Usage with a browser or iOS- or Android phones/tablets (in PowerApps app)
- Use with Office 365 account
  - Can be shared to users / groups
- Integrates to Office 365 tools and Microsoft cloud services
- Enables small/quick and more ambitious solutions

You might think that the PowerApps is just for building simple mobile apps. Or just for customizing SharePoint list forms.

But it is much more.

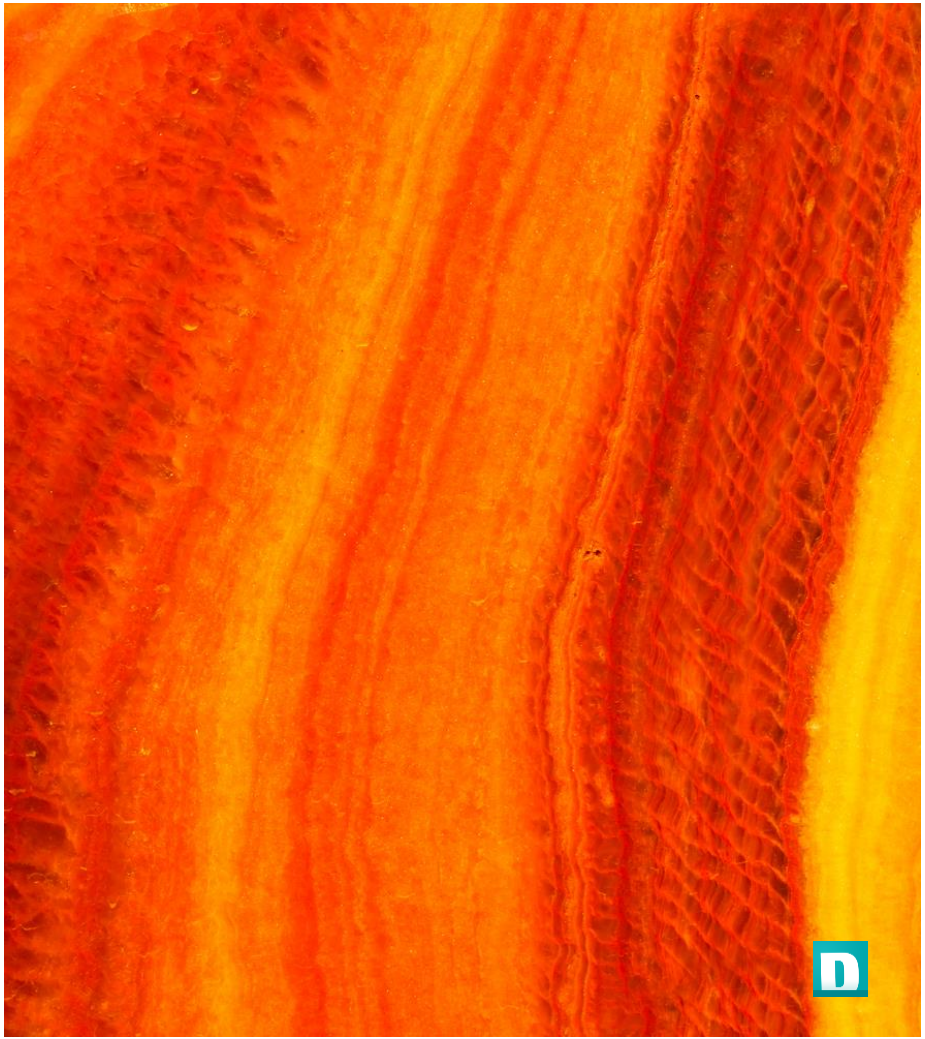
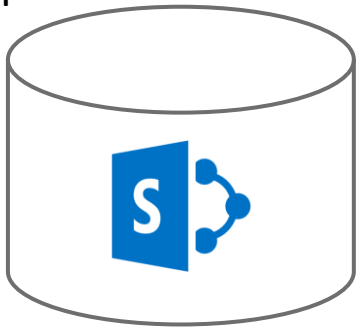
Delegation



Example: Delegation supported

”Give me all stores where Location = Helsinki”

”Here you are. All 1000 stores located in Helsinki”

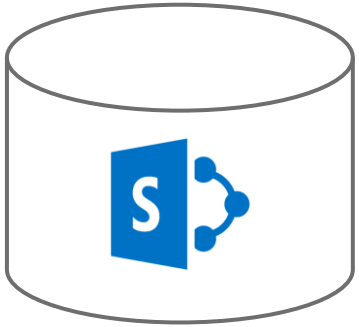


5000 items

Example: Delegation not supported

”Give me all stores name containing string Kioski”

”Here are 500 first stores. Please find what you want by yourself”



5000 items

Delegation support depends on used…

- **Data source** (SharePoint, SQL Server, Dynamics 365, CDS for Apps, Excel, Google Sheet…)
- **Function** (Filter, Search, LookUp, Sort…)
- **Predicates** (Not, In, StartsWith, +, -, <, <=, =…)

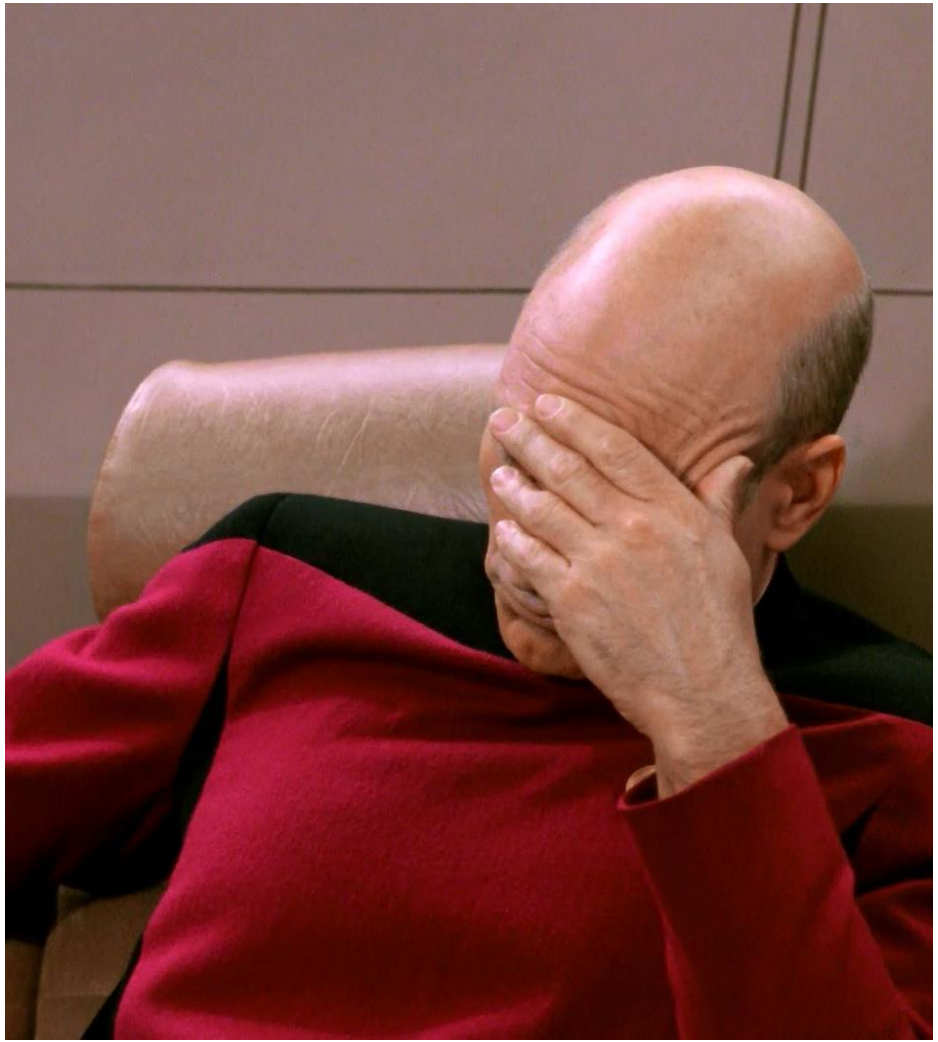
Lessons learned

DIGITAL ILLUSTRATED

1. Don’t underestimate SharePoint lists

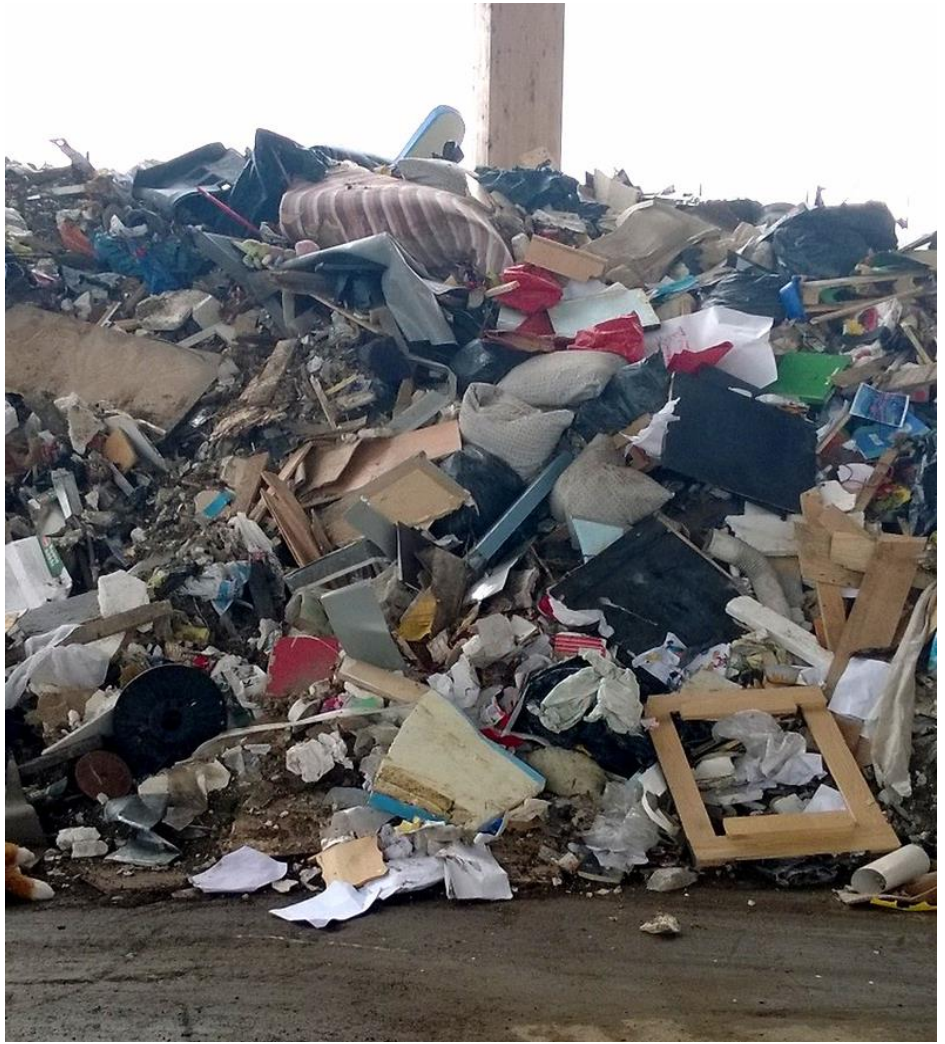


2. Don’t overestimate SQL databases

3. Find out what mobile devices end users use

Image: Jorge Barrios

4. Start planning governance now



Thank You!
