PowerApps example

Store audits

Mobile App for auditing stores

- Company X have 500 resellers
- They want to audit resellers stores
- Simple PowerApps for auditors
 - Data stored in SQL Database
 - Stores have location information -> Application shows only stores near end user
 - End user checks few key factors from store and reports them with PowerApps

Demo

- Mobile PowerApps for Store Audits
- Embed Power BI into PowerApps
- Using PowerApps custom visual in Power BI

Thank You!!
