Definition of Power Apps Cards

“Power Apps cards are micro-apps with enterprise data and workflows and interactive, lightweight UI elements that other applications can use as content.

Because they're part of the Power Apps ecosystem, cards can add business logic through Power Fx and integration with business data through Power Platform connectors. Using cards, you can quickly build and share rich, actionable apps without any coding or IT expertise.”

<https://learn.microsoft.com/en-us/power-apps/cards/overview>

A little bit background... Adaptive Cards

- Block of information that can be used in different platforms (bots, Teams, Outlook, Cortana...)
- Authored in **JSON format**
- Create with designer: <https://adaptivecards.io/designer/>
- Easy to use in Teams (flow: Post card in a chat or channel)

Adaptive Cards - Examples

Microsoft Corporation
Nasdaq Global Select: MSFT

Hi 50
Lo 41

How was your week?

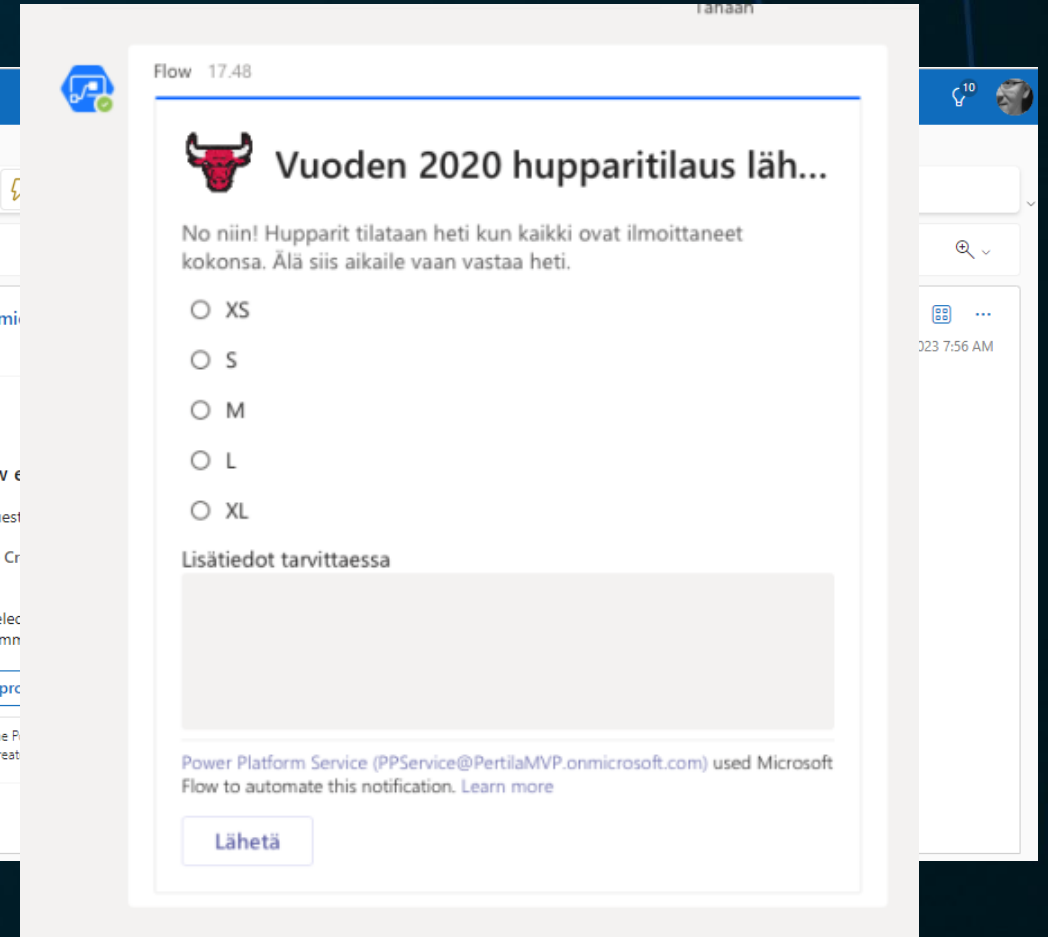

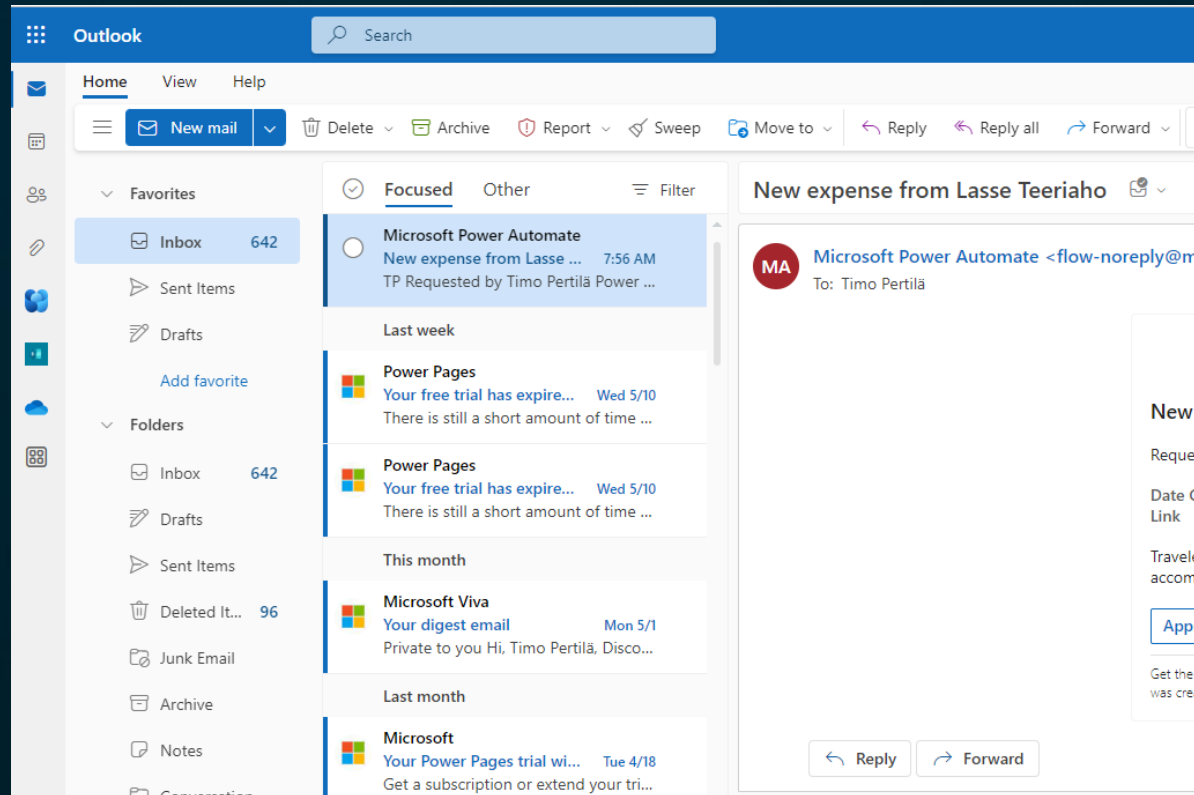

Happy or not? Please respond our weekly empolyee satisfaction survey. It takes only 1 minute having only one mandatory question.

[Open survey](#)

Extending Adaptive Cards with actions

- Embed actions in the adaptive card
- Users can perform small tasks without extra context switch
- Easy to use in Teams (flow: Post adaptive card and wait for a response)

Examples

Demo!

Collect hoodie orders

Finally... Power Apps Cards

- Making this (Adaptive Cards) easier
- “Boosted adaptive cards”
 - Use PowerFX
 - Use connector(s)
 - Persistent variables
 - Multiple pages
- They are still adaptive cards
 - Not pixel perfect
 - You need to post a form

Demo!

Power Apps Cards

Using the card

Adaptive Card

Create a adaptive card

Add dynamic data

Send card into Teams

Handle the response

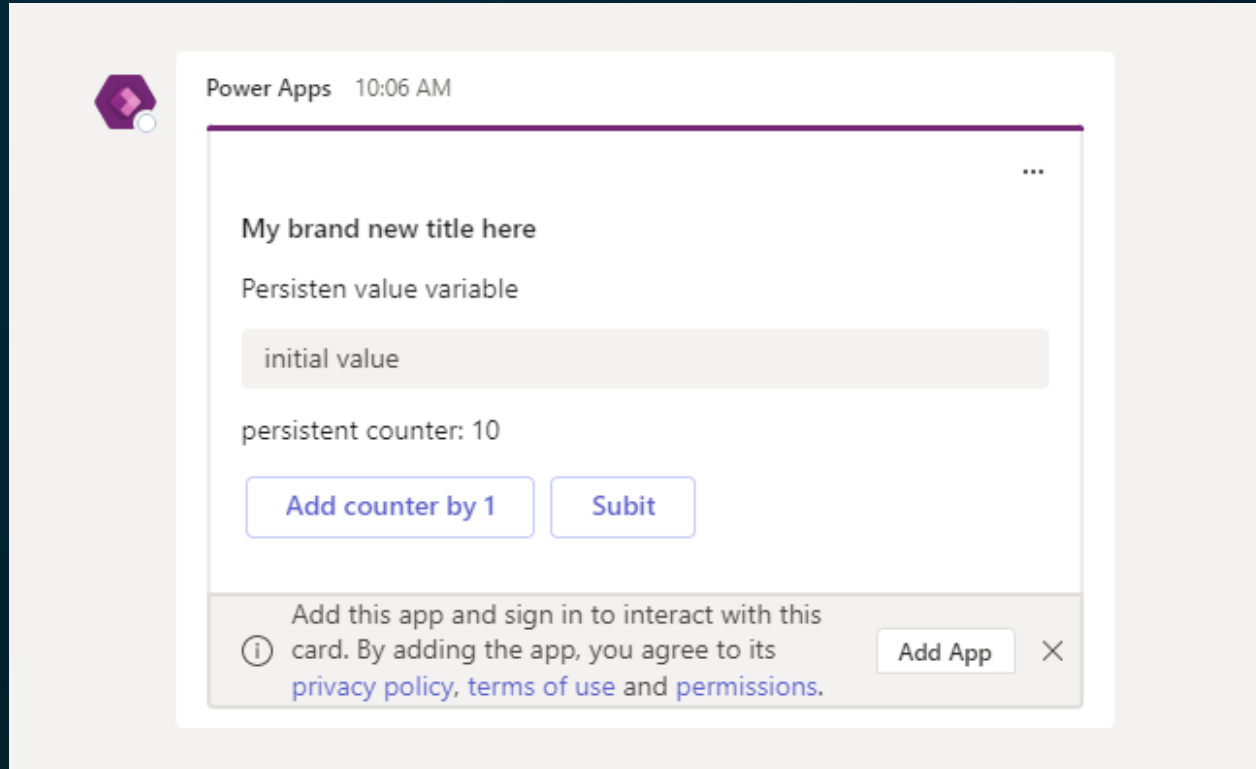

Power Apps Card

Create a card

Create card instance

Send card into Teams

Requires Power Apps App on Teams

Cards and Solutions?

}
```

My thoughts

- Still on Preview
- Waiting for more connectors
- Waiting more hosting platforms
- Should I use instead of Adaptive Cards?
- Should I use instead of Power Apps?

Thank You!
